ACCREDITED ACTIVITY 16 CPD CREDITS #1015304

City & Guilds ACCREDITED

Fire and Smoke Restoration Foundation

Mitigation, Assessment, and Remediation

This one-day course is designed for damage management practitioners, office-based insurance professionals, surveyors, and housing maintenance managers who wish to understand the principles of fire and smoke damage and restoration.

Professionals responsible for identifying, managing, and remediating fire and smoke contamination in buildings carry a legal duty of care to others. This requires not only practical skills but also strong technical knowledge across multiple disciplines.

The course introduces the core principles and best practices of fire and smoke remediation as applied to the built environment, providing a structured framework for participants to strengthen their expertise and apply it effectively in real-world scenarios.

Why Choose City & Guilds?

City & Guilds has over 130 years of experience in vocational education, having been created in response to the needs of businesses to develop a pipeline of well-trained talent. Built on the heritage to create vocational services that continue to meet the changing needs of businesses in the UK and around the world. City & Guilds accreditation is an instantly recognisable mark of quality and credibility and recognises the process and delivery of a bespoke training programme.

Course Benefits and Aims

Delegates who successfully complete the course will be awarded the Dewpoint Professional Fire and Smoke Damage Restoration Foundation certificate, accredited by The City & Guilds of London Institute.
The course will enable the delegates to develop the necessary knowledge and skills required to undertake mitigation, assessment, remediation and management with reference to Professional Fire and Smoke Damage Restoration enabling them to:

- Understand the science and principles of fire and smoke damage restoration, including damage assessment, contamination, and effective restoration techniques.
- Carry out safe, compliant and professional restoration projects, applying health and safety, environmental responsibilities, project management, and industry best practice.
- Deliver high-quality restoration outcomes, using appropriate inspection methods, equipment, cleaning processes, reporting, and customer service standards.

Entry Requirements

The Dewpoint Professional Fire and Smoke Remediation Foundation Course is designed for those involved in office-based operations within the insurance, housing, or damage management sectors. While prior specialist knowledge of fire and smoke remediation is not essential, delegates will benefit greatly from having relevant experience, as the course builds real-world scenarios. A basic understanding of English, mathematics, and science will also support successful completion of the programme.

Assessment

Assessment of this course takes place at the end of the 2nd days training and undertaken on-line as an open-book multiple choice assessment of 50 questions. PASS: 80% or above, REFER: 0-79%.

Where can you go from here?

Once you have achieved course certification, you are encouraged to continue building your expertise by progressing to additional Dewpoint Professional courses in Water Damage Restoration and Mould Restoration, enabling you to broaden and deepen your professional knowledge and skills.
